4.00

UCEAP Semester Units

2.70

Course Description

This course provides an introduction to the theory and methods of modern econometrics. It begins by reviewing and extending the statistical material covered in the senior freshman year. Following this, students are guided through the fundamental principles of econometrics and working through to more advanced topics as the module progresses. The course provides a balance between core theoretical material and an extensive applied component which develops student's practical skills necessary to conduct independent applied research.
