**UCEAP Semester Units**

3.30

**Course Description**

This course places a normative emphasis on how social policy, planning and practice are a force for progressive transformation and sustainable, equitable, gender-aware and socially-just development. The study of long-term structural and macro dimensions is combined with attention to the local and the specific, within Hong Kong and the wider world. Diverse areas of social development practice including planning and intervention, asset building, community action, employment and decent work, microfinance and microenterprise are explored using case study and experiential learning to develop analytical skill and allow practical application of classroom based learning.
