Course Description

This course introduces the field of food science and technology. It touches very lightly on various aspects of the field including chemistry, nutrition, biochemistry, processing and regulation. The course examines the current thinking and information in regards to the importance of diet and health. It explores traditional and more modern views on what constitutes an adequate and healthy diet. The course examines the composition of food, potential contaminants of food, as well as how an individual should balance their diet in relation to specific needs.
