EARTH SCIENCE & THE ENVIRONMENT:TOWARDS A SUSTAINABLE FUTURE

Country

United Kingdom - Scotland

Host Institution

University of Glasgow

Program(s)

Scottish Universities,University of Glasgow

UCEAP Course Level

Upper Division

UCEAP Subject Area(s)

Earth & Space Sciences

UCEAP Course Number

110

UCEAP Course Suffix**UCEAP Official Title**

EARTH SCIENCE & THE ENVIRONMENT:TOWARDS A SUSTAINABLE FUTURE

UCEAP Transcript Title

SUSTAINABLE FUTURE

UCEAP Quarter Units

8.00

UCEAP Semester Units

5.30

Course Description

The course builds on EARTH1001 highlighting practical techniques for study of the planet, including the use of the fossil record; the origin and sustainable use of Earth's renewable and non-renewable resources; how geology and the landscape combine to generate sedimentary rocks; and hazards and contemporary challenges for geologists to tackle. By having an in depth understanding of geological and other natural processes a student is better able to understand the effects global warming will have in the future and on the present.

Language(s) of Instruction
