UCEAP Course Number 112
UCEAP Course Suffix
UCEAP Official Title DERIVATIVES
UCEAP Transcript Title DERIVATIVES
UCEAP Quarter Units 4.00
UCEAP Semester Units 2.70

Course Description
Derivatives have become extremely popular investment tools over the past 30 years, as they allow investors to tailor the amount and type of risk they take, be it risk associated with changes in interest rates, exchange rates, stock prices, commodity prices, inflation, and so on. This course examines the primary types of derivatives (forwards, futures, options, and swaps), shows how they are used to achieve various hedging and speculating objectives, outlines a framework for pricing derivatives and studies some applications of derivative-pricing techniques outside derivative markets. The course provides a good grounding in techniques and approaches for the measurement and management of financial risks.
