

COURSE DETAIL

ESSENTIAL PROTEIN STRUCTURE AND FUNCTION

Country

United Kingdom - England

Host Institution

University College London

Program(s)

English Universities, University College London

UCEAP Course Level

Upper Division

UCEAP Subject Area(s)

Biochemistry

UCEAP Course Number

111

UCEAP Course Suffix**UCEAP Official Title**

ESSENTIAL PROTEIN STRUCTURE AND FUNCTION

UCEAP Transcript Title

PROTEIN STRUC&FUNCT

UCEAP Quarter Units

6.00

UCEAP Semester Units

4.00

Course Description

This half course unit is designed for students whose principal discipline is not Biochemistry, but whose interests lie in the broad area of biological sciences. It is primarily a lecture course with tutorials and a dry lab practical on protein structures. The course covers key topics in protein structure and function. The depth of understanding of these topics that students attain equips them for final year studies in non-molecular based fields of biological science such as Anthropology, Psychology, and Physiology, or in some cases Human Sciences.

Language(s) of Instruction

English
