

# COURSE DETAIL

## ANATOMY AND DEVELOPMENTAL BIOLOGY

**Country**

United Kingdom - England

**Host Institution**

University College London

**Program(s)**

Summer at University College London

**UCEAP Course Level**

Upper Division

**UCEAP Subject Area(s)**

Biological Sciences

**UCEAP Course Number**

103

**UCEAP Course Suffix**

S

**UCEAP Official Title**

ANATOMY AND DEVELOPMENTAL BIOLOGY

**UCEAP Transcript Title**

ANATOMY&DEV BIOLOGY

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

### **Course Description**

This course provides an introduction to significant aspects of human anatomy and embryonic development. The course covers topographical anatomy and embryonic development of the nervous system, cardiovascular system, respiratory system, digestive system, musculoskeletal system, urogenital system, and limbs. The first few weeks of human development are examined, alongside the cellular organization of tissues and organs. An understanding of the key principles of embryonic development is provided. The course is taught through lectures, a series of seminars covering more specialized topics, a small number of practicals, and a class in the Anatomy Laboratory (Dissecting Room).

### **Language(s) of Instruction**

English

### **Host Institution Course Number**

ISSU0019

### **Host Institution Course Title**

ANATOMY AND DEVELOPMENTAL BIOLOGY

### **Host Institution Campus**

### **Host Institution Faculty**

### **Host Institution Degree**

### **Host Institution Department**

Biosciences
