ENVIRONMENTAL SOCIOLOGY

**UCEAP Transcript Title**

ENVIRNMNTL SOCIOLGY

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

## Course Description

The course requires students to grapple with the multiple dimensions of socio-environmental relationships and seeks to assist them in doing so by teaching them the interdisciplinary field of environmental sociology. It explores different philosophical frameworks and theoretical constructs, which provide distinctive insights into the ways in which human beings continuously (re)create their social and natural environments, and how these environments influence individual behavior and social organization. This course helps students to develop their capacity to describe, analyze and understand historical and contemporary environmental issues and social movements, and to make constructive contributions to environmental policy debates.
