**UCEAP Transcript Title**

HIGHER COGN FUNCTNS

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

**Course Description**

This module focuses on attention, memory, language, thinking, problem-solving, cognitive control, decision-making, and awareness. Through theoretical studies and practical exercises, this course conveys knowledge about the structure and function of the brain and key areas of modern cognitive psychology such as attention, memory, language, cognitive control, emotions, and social interaction. The understanding of normal function is the primary focus of the course, but clinical examples are also used as they provide substantial illustrations of normal functioning. Furthermore, the course provides students with knowledge of relevant research methods within the area and a major emphasis is placed on the interdisciplinary nature of the subject.
