## Course Description

This course examines the development, diagnosis, and treatment of key mental health conditions across the lifespan, from children through to adults. Beginning with an exploration of how mental health conditions are classified and diagnosed, this course will then discuss what is known about the causes, prevalence and treatments of each of the main psychological disorders, including: anxiety disorders (e.g. generalized anxiety disorder); obsessive compulsive and related disorders; trauma- and stress-related disorders; depressive disorders; eating disorders (anorexia nervosa, bulimia nervosa, binge eating); addictive behaviors (drug, alcohol, gambling); psychotic disorders; personality disorders; sexual dysfunctions; ADHD and conduct disorder.
