Course Description

This course introduces the psychology of language which explores the relationship between the human mind and language. It aims to gain insights into the way in which the configuration of the human mind shapes language. It is concerned with how the cognitive system processes language and tries to provide accounts for it in terms of cognitive models based on experimental data. This course covers the following topics: language and the brain; language acquisition; animal communication and language; origin of language; representation of linguistic information in memory; sentence processing, and text comprehension.
