Course Description

This course aims discusses the main theories on learning and memory from a cultural differences perspective (for example, learning and cognitive styles in Western vs Eastern cultures), of intelligence, personality, and personality disorders from an individual differences perspective. The course examines theories on mood, emotion, and motivation. At the end of the course, students should be able to exhibit knowledge on theories and methods used to study personality, intelligence, learning, memory, emotion, and motivation from an individual and cultural differences perspective. This course requires students to have completed a general Psychology course as a prerequisite.
