UCEAP Course Suffix
UCEAP Official Title PRACTICING INTERDISCIPLINARITY
UCEAP Transcript Title INTERDISCIPLINARITY
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

This course explores the multitude of ways in which human development and the environment are connected. It provides an understanding of key theoretical, conceptual, and practical debates and issues within the agriculture/environment-development field and allows students to practice interdisciplinarity through active participation in discussions and group work. The course explores the intersections of economic growth, social development, and environmental conservation. It considers important development questions such as the reason for hunger and famine, how globalization affects access to resources and social dynamics, and how gender inequality intersects with development. Sessions are devoted to epistemological reflections for each of these themes. This course places particular focus on countries in the Global South.

Language(s) of Instruction
English
