UCEAP Semester Units

5.30

Course Description

This course examines island and ocean geographies in postcolonial contexts, such as climate change, forced migration, militarization, biodiversity, and the blue economy. Geographic theories, including material geographies, political geographies, more-than-human geographies, and feminist geographies are explored. Topics include geographic concepts of region, scale, scarcity, boundaries, marginality, and identity. Case studies are drawn from the wider Pacific region, including New Zealand.
