Course Description

This course examines how journalist have occupied a unique place in Western popular culture and looks at questions such as why are journalist so ubiquitous in popular culture; how accurate have those depictions been now and in the past; how has the depiction of journalist changed over time, and how have those changes mirrored the public perceptions of journalists and journalism; how do those depictions of journalist compare to reality; how has popular culture dealt with real life ethical dilemmas that confront journalists; and how effective have real-life journalists been at telling their own narratives — portraying the gritty reality, or embellishing the fictionalized view of the profession.
