# **COURSE DETAIL**

# **INTRODUCTION TO ASTROPHYSICS**

# **Country**

United Kingdom - England

#### **Host Institution**

Exeter College, University of Oxford

# Program(s)

Summer in Oxford

### **UCEAP Course Level**

Lower Division

# **UCEAP Subject Area(s)**

Physics Earth & Space Sciences

### **UCEAP Course Number**

85

### **UCEAP Course Suffix**

S

#### **UCEAP Official Title**

INTRODUCTION TO ASTROPHYSICS

# **UCEAP Transcript Title**

**INTRO ASTROPHYSICS** 

### **UCEAP Quarter Units**

6.00

### **UCEAP Semester Units**

### **Course Description**

This course provides an introduction to our knowledge of the universe, from the solar system out to the most distant galaxies, and from the present day back to the earliest times. Students explore physical questions and make quantitative investigations, but with a simple level of mathematics so that the spotlight is always on the basic physics concepts. The only prerequisite is introductory general physics, including calculus to the level of differentiation of simple functions.

# Language(s) of Instruction

English
