AGRI-ENVIRONMENTAL ISSUES AND POLICY

UCEAP Transcript Title
AGRI-ENVIRON ISSUES

UCEAP Quarter Units
4.00

UCEAP Semester Units
2.70

Course Description
This course assesses the impact of agricultural practices on the wider environment and agri-environmental policy responses towards the mitigation of such impacts at both national and EU level. Important environmental issues in Irish agriculture and related land uses are discussed from the perspective of the protection of natural resources (air, water, and soil quality), biodiversity, and natural and cultural heritage. The course provides both an understanding of the major environmental issues generated by Irish agriculture and the consequent responses of policy makers to address these issues.

Language(s) of Instruction
English
