Course Description

This course provides a study of the development of urban architecture and environmental landscape, as well as the evaluation of world-famous architectural landscape. It covers the development process and notable achievements of the aesthetic creation of architecture and environmental landscape, both in ancient and modern China and around the world. The course provides an analysis of the architectural ideas, theories, and techniques of each historical period, including the types, features, styles, forms, structural features, artistic features, and their evolution. Other topics include architectural communication culture, integration of architectural culture and art, and architectural features as well as the religious, cultural, social and technological factors that have shaped these architectural features.
