Course Description
This course examines the development, usefulness, classification, composition, and application of cosmetics and perfumes. Students gain pertinent information for the selection and evaluation of these items, and acquire an overview of the marketing and regulatory aspects of the global industry for these products. Major topics: history of cosmetics and perfumes; formulation, manufacture, and use of perfumes; biology of the skin, cosmetic preparations, consumer information, and precautions; regulatory and industrial aspects of these products; scents and the sense of smell; and research and development in cosmetology and perfume technology.
