LIVING ON AND INHABITING EARTH

**UCEAP Transcript Title**

LIVING ON EARTH

**UCEAP Quarter Units**

4.50

**UCEAP Semester Units**

3.00

**Course Description**

This course discusses the connection between populations and their environment. It studies human geography in relation to global populations, with an emphasis on the populations' divisions over space and their systems of habitation. This includes demographic dynamics, movement, disparities and socio-spatial segregations, relations of populations to their living space, and territorial systems.
