Course Description

This course reviews organizations and workplaces with a focus on how to enhance relationships with the organizations. Organization Theory is a branch of social sciences that is particularly interested in the why, how, and when multiple individuals join efforts to reach a common goal. It is a multidisciplinary subject drawing from disciplines such as arts and humanities, educational sciences, psychology, evolutionary biology, economics, and politics. These multiple lenses through which we view organizations make Organization Theory a fascinating and relevant topic to explore and examine at any stage of your study program. The main topics covered in this course are organization-environment relations, organizational design types and culture, leadership development, HRM and well-being, and managing diversity and inclusion at work.
