## Course Description

This course studies individual differences in personality, intelligence, and cognitive functioning, and differences between nomothetic and idiographic approaches. The course discusses topics including personality, intelligence, limits of intelligence as a construct and theories of hot intelligence (e.g., emotional intelligence), nature/nurture interaction, individual characteristics and their impact in everyday life, individual specificities in cognitive functioning, graphical representations of individual performance, and lifelong impact of age and education on cognition. This course requires knowledge of basics concepts of psychology as a prerequisite.
