Upper Division

UCEAP Subject Area(s)
Biological Sciences

UCEAP Course Number
114

UCEAP Course Suffix

UCEAP Official Title
GENERAL ZOOLOGY

UCEAP Transcript Title
ZOOLOGY

UCEAP Quarter Units
6.00

UCEAP Semester Units
4.00

Course Description

This course focuses on the major groups within the animal kingdom, what defines them, how they are organized and how they are related to each other. Students examine the specific adaptations of certain animals in more depth. The question "What is an animal?" is considered as is the issue of how animals are grouped and related to each other. This is done in the context of the major phyla, their defining morphological, anatomical and physiological features and the sorts of adaptations and behaviors that they exhibit. Students examine certain adaptations such as bright coloration, feeding or parental care in greater depth, using particular animal groups as a source of examples.
