INTRODUCTION TO MARINE GEOLOGY

**UCEAP Transcript Title**

INTRO MARINE GEOL

**UCEAP Quarter Units**

1.50

**UCEAP Semester Units**

1.00

## Course Description

This is an undergraduate-level course, suitable for students without any background in marine geology and geophysics. The course covers geological processes across scales, spanning plate tectonics, marine sediment types, formation and process, as well as paleoceanography. Some of the topics covered are across disciplines, such as sediment type (chemistry) and benthic bioturbation (biology), with emphasis on the link between different branches of oceanography.

### Language(s) of Instruction

English

### Host Institution Course Number

Ocean5001

### Host Institution Course Title

INTRODUCTION TO MARINE GEOLOGY
