## **UCEAP Transcript Title**

PERCEPTION/LIFESPAN

# **UCEAP Quarter Units**

4.00

#### **UCEAP Semester Units**

2.70

### **Course Description**

This course provides an overview of the development of the main human sensory systems and related perceptual abilities from the moment of conception throughout the lifespan. The approach is mainly from a neuroscience and behavioral perspective, with cortical development and consequent effects on behavior analyzed. The effect of genetic and environmental factors on sensory development is discussed. The effects of ageing on sensory and perceptual decline are also included.

## Language(s) of Instruction

English
