## Course Description

Drawing upon the work of anthropologists, archaeologists, evolutionary biologists, geographers, historians, philosophers, psychologists, sociologists, veterinary medics, wildlife conservationists, and zoologists, the course examines a range of topics in the field of human-animal studies. These include the human as animal; human/animal distinctions; human/animal boundaries; classification systems; the history and consequences of the domestication of animals; zoonotic diseases; human-wildlife conflicts; food and farming; working animals; pets and pet-keeping; animals in science and medicine; animals in education, entertainment, and sport; violence against animals; animal protection and animal rights movements; and the future of human-animal relationships.
