## Course Description

This course introduces the theory and policy of international trade and examines its relation to both international and domestic policies. Major topics include classical trade theory, strategic trade theory, and various models (Ricardian, Heckscher, specific factors, etc.); the theory of comparative advantage; international trade and factor prices; income distribution; economic development; trade policy and economic welfare (developing countries, advanced countries); and such commercial policies as tariffs and quotas. The course also discusses recent developments in trade liberalization, labor mobility, and international investment. Students should have some knowledge of differential calculus. Text: P.R. Krugman and M. Obstfeld, INTERNATIONAL ECONOMICS. Assessment: midterm exam (50%) and a final exam (50%).
