UCEAP Course Suffix
UCEAP Official Title GENES AND BEHAVIOR
UCEAP Transcript Title GENES AND BEHAVIOR
UCEAP Quarter Units 5.00
UCEAP Semester Units 3.30

Course Description

This course examines how genetics translate into normal and pathological behaviors. The course discusses topics including basic concepts of genetics and heritability; how the interplay between genes and environment can influence behavior; behavioral implications of some of the main genetic and chromosomal disorders such as Down syndrome, Williams syndrome, and fragile X; and genetical underpinnings of some behavioral traits in the normal and pathological field. Students are required to have knowledge concerning the basics of biology and genetics as a prerequisite.

Language(s) of Instruction
English
