Course Description
The course examines corporate financial decisions in an international setting starting with basic concepts of international financial markets. These concepts include the global foreign exchange market and its operations, the international capital market, the global bond market, the international equity markets, and cross-border portfolio investment. The course then discusses corporate financial decision issues including risk management, investment, capital structure, capital budgeting, and cash management in the global context. Text: C.S. Eun and B.G. Resnick, INTERNATIONAL FINANCIAL MANAGEMENT. Assessment: in-class and tutorial performance, assignments, midterm exam, final exam.
