Course Description

This course is designed as an intermediate-level exploration of Microeconomics. A foundational understanding of Microeconomics concepts is expected, as we will extensively use mathematical analysis to delve into the decision-making processes of economic agents in various contexts. Key areas of study include Consumption Theory, Production Theory, Partial Equilibrium, Competitive Markets, and Monopoly Markets, with a focus on theoretical derivations. Elementary calculus, particularly differentiation, will be employed as necessary throughout the course.

By the end of this course, students will:

- 1) Gain a comprehensive understanding of key Microeconomics topics: Consumption Theory, Production Theory, Competitive Markets, and Monopoly.
- 2) Grasp the microeconomic paradigm and appreciate the value of microeconomic analysis.
- 3) Enhance their ability to apply economic analysis to a range of issues.
- 4) Develop formal modeling skills, enabling them to translate real-world problems into mathematically manageable models.
