Course Description

This course is part of the Laurea Magistrale program. The course is intended for advanced level students only. Enrollment is by consent of the instructor. The course addresses recent topics in the field of Global Health. Specific topics critical assessment of recent health care reforms in LMICs; efforts to extend coverage of health care and improve universal coverage; issues in financing schemes of health care in LMIC; definition of healthcare policy priorities and the assessment of economic burden of disease in LMICs; the role of NGOs and multilateral institutions; key policy interventions on prevention, workforce planning, and capacity building. The course examines global health issues from the standpoint of health policy and systems. It aims to provide an overview of key global health policies and an introduction to the main challenges, issues, and solutions in global health. The course covers the following topics: global health trends and estimates of health indicators; global health policy landscape; health systems approaches to global health challenges; global governance and health; global health financing architecture; financing health systems and universal health coverage; and evidence for global health policies. The course includes lectures, case studies, group discussions and presentations.
