Course Description

This course introduces international macroeconomics and international finance. It examines the macroeconomic and financial linkages between countries. Topics include national income accounting, the balance of payments, the operation of the exchange rate systems, the international capital market, the international monetary system, and the mechanisms of adjustment of exchange rate, interest rate, current account balance, output and price level in response to monetary and fiscal policies. Some issues regarding the Chinese economy, such as the current account imbalance and capital flow, and RMB exchange rate are discussed.

Note: This course has a different unit value than a similar course with the same name (International Finance) also offered by the School of Economics at Fudan University.
