Course Description

This course uses Skam, a Norwegian web-series made for girls aged 16-18, as a case study to explore more general media studies questions about web television and digital storytelling. Students specifically focus on the aesthetic and narrative possibilities offered by web television as a fiction medium. The course is located in the intersection between television studies and studies of new media. Students investigate Skam with regard to web television history, web television production, web television aesthetics, and reception.
