4.50

**UCEAP Semester Units**

3.00

## Course Description

This course provides a study of various economic theories dealing with issues related to international cooperation and development and their relationship to national growth. In particular, we recognize the need for international cooperation by examining the impact of agricultural development on the national economies of developing countries. Furthermore, by learning about the relationship between agriculture and issues such as inequality and poverty, population and health, the course provides fundamental knowledge on a variety of international issues such as growth processes in developing countries, sustainable agriculture, and rural development. Lastly, as part of the case study, students are expected to learn in detail about economic growth through agricultural cooperation and effect analysis of official development assistance (ODA).
