UCEAP Semester Units

3.00

Course Description

This course covers the basic concepts and usages of data structures and algorithms used in electrical and/or computer engineering. The objectives are learning data structure types and usages - arrays, lists, queues, trees, graphs, etc.; learning algorithms - sorting, hashing, searching, etc.; improving C++ programming and debugging skills; and learn data structures and algorithms in C++. Students may choose any working environments, but class materials assume Linux by default. No prior experiences in Linux are necessary to enroll.

Language(s) of Instruction

English
