Course Description

This course is a study on global markets and the implications of economic globalization on consumers, entrepreneurs, and governments. It examines theory and empirical data to analyze international trade and macroeconomic issues. Topics of study include: globalization and trade, the Ricardian Model, the Hecksher-Ohlin Model, increasing returns and monopolistic competition, offshoring of goods and services, balance of payments, financial globalization, exchange rates and currency markets, monetary and asset approaches to establishing exchange rates, macroeconomic policy in an open economy, and the European Monetary Union.
