# **COURSE DETAIL**

# **SOCIAL NEUROSCIENCE**

## **Country**

Netherlands

#### **Host Institution**

Maastricht University - Center for European Studies

## Program(s)

Psychology and Neuroscience, Maastricht

### **UCEAP Course Level**

**Upper Division** 

## **UCEAP Subject Area(s)**

Psychology

### **UCEAP Course Number**

131

## **UCEAP Course Suffix**

#### **UCEAP Official Title**

SOCIAL NEUROSCIENCE

## **UCEAP Transcript Title**

**SOCIAL NEUROSCIENCE** 

## **UCEAP Quarter Units**

6.00

#### **UCEAP Semester Units**

4.00

### **Course Description**

Social Neuroscience is a new and rapidly growing field of research. It is an interdisciplinary field that asks questions about topics traditionally of interest to social psychology, economics, and political science using methods traditionally employed by cognitive neuroscientists, such as functional brain imaging. The course discusses functional MRI research within the following topics: self-reflection, emotion regulation, perceiving others/mirror neurons, intersubject/hyper-scanning designs, and moral judgment. Students gain insight into the neural correlates of social behavior and acquire knowledge about designing a functional MRI study.

### Language(s) of Instruction

English

### **Host Institution Course Number**

PSY3332

#### **Host Institution Course Title**

SOCIAL NEUROSCIENCE

## **Host Institution Campus**

Maastricht University

## **Host Institution Faculty**

Faculty of Psychology and Neuroscience
