Course Description
This course explores the concept of time-- how it is understood by different sciences such as physics and biology, and how it relates to the way in which humans experience the progress of existence. It discusses topics such as the arrow of time, the multiverse, embryonic development, and again as well as views of time from the perspective of the arts, including literature, painting, and music. Finally, this course analyzes how humans measure time, both with artificial devices and through genes.
