Course Description

This course covers mental disorders. Students learn about mental and behavioral distress and/or dysfunction and how to promote subjective well-being and personal adaptation. Case studies on different anxiety disorders, eating disorders, addictions, mood disorders, psychotic disorders, and personality disorders are used. Questions continually raised during the course are: what is the clinical picture? where is the boundary between no need for care and need for care? what causes such a disorder? what can be done about the disorder? the gap between theory and practice, between scientific thinking and clinical treatment are evaluated. Different theoretical schools are examined.
