ANALYSIS 4: REAL ANALYSIS

UCEAP Transcript Title

REAL ANALYSIS

UCEAP Quarter Units

6.00

UCEAP Semester Units

4.00

Course Description

This course reinforces and extends analysis of a single variable to topics including uniform convergence. The concept of a metric space is then developed to produce results generalizing those in one variable. Topics include pointwise and uniform convergence, the Weierstrass approximation theorem, orthonormal systems and Fourier Series, normed and metric spaces, Banach contraction mapping theorem, continuity, compactness, and spectral norms.

Language(s) of Instruction

English
