

# COURSE DETAIL

## EVOLUTION IN ACTION 2

**Country**

United Kingdom - Scotland

**Host Institution**

University of Edinburgh

**Program(s)**

University of Edinburgh

**UCEAP Course Level**

Upper Division

**UCEAP Subject Area(s)**

Biological Sciences

**UCEAP Course Number**

103

**UCEAP Course Suffix****UCEAP Official Title**

EVOLUTION IN ACTION 2

**UCEAP Transcript Title**

EVOLUTION ACTION 2

**UCEAP Quarter Units**

8.00

**UCEAP Semester Units**

5.30

## Course Description

This course outlines the major processes giving rise to the diversity of extinct and extant organic life, to indicate the time frame over which these processes occur, and to introduce the methods used to study evolutionary processes. The examples used in the lectures and workshops are drawn from animals, plants and microorganisms, and the characters considered are behavioral, ecological, morphological, cellular and molecular. Visits to Edinburgh Zoo and the National Museum of Scotland allow students to think about how the evolutionary concepts that they learn apply to real organisms.

## Language(s) of Instruction

English

## Host Institution Course Number

BILG08005

## Host Institution Course Title

EVOLUTION IN ACTION 2

## Host Institution Course Details
