## Course Description

This class examines the dynamic and global nature of education and the rigorous ways in which scientific information and knowledge are produced and constructed based on individual differences, cultural circumstances, and local and global phenomena. In particular, it provides theoretical exposure on the core concepts of education, culture, and comparison; comparing and analyzing theoretically backed and scientifically proven aspects, cases, and issues of concern to culture and education; offering opportunities for to express emic and etic views as either the bearers or observers of culture or educational experience; and encouraging the use of socio-culturally influenced subjective and objective lenses in comparatively reading, speaking, listening, and writing about the educational issues that are uncovered in class. Prerequisites: 1000-2000 Basic Courses on Education, Sociology, or Anthropology
