**UCEAP Semester Units**

3.00

## Course Description

This course introduces basic notions for translating medical terms from French to English, beginning with documents for lay readers followed by documents for specialists. It provides practice in digital research techniques for both stages of the translation process: comprehension and reformulation. The course covers revision of stylistic issues as well as structural and language differences between French and English as they arise in the text studies.

### Language(s) of Instruction

French
