Course Description
This course provides students with fundamental theories of project management, knowledge management, and skills for applying classic project management tools. In addition, students gain practical experience through exercises in classic project management which highlight its relation to organizational structures and knowledge management processes during project conception, project planning, and project implementation. The classic project management tools covered include work breakdown structure, network diagram, Critical Path Method and Gantt chart, which are used for project documentation, budgeting, and control processes. The course includes both theoretical insight and practical assignments using project management methods and tools related to project conception, project planning, and project implementation and closure.
