**UCEAP Quarter Units**

8.00

**UCEAP Semester Units**

5.30

## Course Description

This course helps students to understand how principles of human rights and social justice underpin social work today. The course introduces students to international human rights frameworks and legislation relevant to social work law and policy. There is a focus on law and policy as it affects social work practice in the UK, particularly in Scotland, and students also consider examples from a wider international field. The course forms a substantial part of the social work degree program and reflects the Standards in Social Work Education set for social work qualifying programs in Scotland. The course welcomes students who are not registered for the social work program but who are interested in how law and policy work together in this important area of social welfare.
