**UCEAP Quarter Units**

8.00

**UCEAP Semester Units**

5.30

## Course Description

This course explores core questions which lie at the heart of International Political Economy (IPE), the discipline that studies the interactions between states and international markets and the governance of the global economic system. These include, among others: how do politics shape international economic relations and vice versa; who are the winners and losers of economic globalization? Is the global economy stable and why do economic crises happen; why is regional integration so widespread today?

## Language(s) of Instruction

English

## Host Institution Course Number
