## Course Description

Groups form a crucial part of our experience as we live our life in groups. It shapes our values, beliefs and outlooks. Understanding the nature, development, processes and influence of groups therefore provides important insights into individual thoughts and behaviors. This course covers the theories, studies and empirical findings related to groups to give basis for understanding group phenomena and a foundation for carrying out research on groups. The course starts by covering concepts to understand group behavior, such as group developmental stages, group structure, and group cohesion. The course then explores the various group-related concepts, such as social loafing, group polarization.
