UCEAP Course Suffix

A

UCEAP Official Title

BIOCHEMISTRY (I)

UCEAP Transcript Title

BIOCHEMISTRY

UCEAP Quarter Units

6.00

UCEAP Semester Units

4.00

Course Description

This course is suitable for students majoring in or specializing in biochemistry. It is recommended to have studied organic chemistry first. The course content covers units such as amino acids, proteins, enzymes, nucleic acids, carbohydrates and lipids, and further details their biochemical principles, mechanisms of action, metabolic pathways and regulatory mechanisms. Because "Molecular Biology" is a compulsory course for the Department of Biochemical Technology, in order to avoid repetition, this course does not teach molecular biology. Sole material to be used in the course: Lehninger Principles of Biochemistry, 8th Edition.

Language(s) of Instruction

Chinese
