3.00

# **Course Description**

This course, intended for international students, provides a study of Earth sciences, natural forces, and natural hazard mitigations. Instruction is provided by experts from four key fields of Earth sciences, who focus on the natural forces and phenomena surrounding the island of Taiwan. Through this course students explore the vibrancy, and sometimes unpredictable risk, of living on this beautiful island. The course format includes lectures, guest speakers, group discussions, and field trips to locations with important natural phenomena.

### Language(s) of Instruction

English
