Course Description

This course examines core areas of social psychology as well as important interdisciplinary areas, including moral psychology, political psychology, cross-cultural psychology, and online behavior. Students explore real-world societal problems from a scientific perspective, discuss how research findings are disseminated, and examine the impact on policy that can follow. The course identifies scientific knowledge and research on social psychology and relevant interdisciplinary areas, and considers the role of empirical evidence in the formation of theory and how theory guides the collection and interpretation of empirical data..
